HANDSAW STROP

DON'T LOSE YOUR SAW

FTC
PLAY WITH GRAVITY

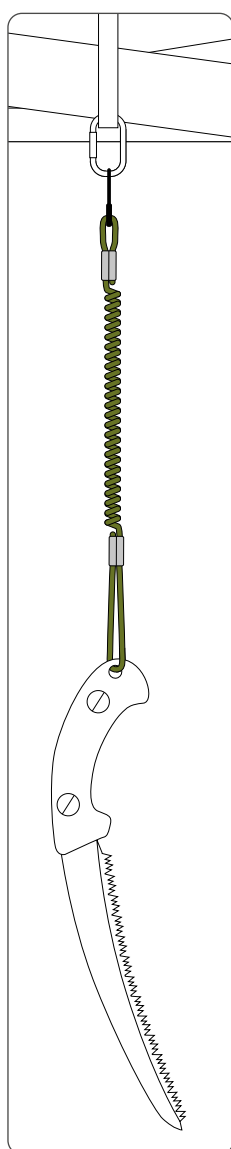

www.ftc-tree.com

THE HANDSAW STROP IS USED TO SECURE A TOOLS WHEN WORKING AT HEIGHT.

TECHNICAL DATA

- Very compact and light.
- Length without load: 20 cm (7.9 in).
- Length under load: 110 cm (4.3 in).
- Sold without carabiner. Weight: 25 g (0.9 oz).

PERFORMANCES

A small accessory that is essential to keep the handsaw attached to the harness. It is light, takes very little space but stretches out easily to use the saw. This way, securing a handsaw no longer is annoying.
